Overview

Depression is a growing mental health concern among students, yet it often remains undetected due to a lack of awareness among educators. Teachers play a critical role in identifying early warning signs, but without proper knowledge and resources, these signs can be overlooked.

So here comes this app. It is a mobile application designed to evaluate and improve teachers' awareness about depression. The app offers a role-based interface where teachers answer a series of targeted questions assessing their knowledge and perceptions of depression. Based on their responses, the app delivers personalized educational videos aimed at increasing awareness and promoting early detection of depression symptoms in students.

By combining assessment with interactive learning resources, it empowers teachers to better understand mental health challenges and support student well-being.

Objective

- **Assess Awareness** – Evaluate teachers' current knowledge and understanding of depression through a structured questionnaire.
- **Provide Educational Content** – Deliver personalized awareness videos and resources based on questionnaire results.
- **Promote Early Detection** – Equip teachers with the knowledge to identify early signs of depression in students.
- **Encourage Mental Health Conversations** – Foster an open and supportive environment in schools regarding mental health.
- **Support Student Well-being** – Empower teachers to take proactive steps in supporting students facing mental health challenges.

Work flow

Features

1. Secure Login & Signup -

The app includes a secure authentication system using email and password. This ensures that all user data is protected and only authorized users can access the platform. Role-based access allows the app to customize content for teachers and students.

Bonus feature -

Language selection - this allows you to change language between kannada ,hindi and english.

2. Quote page-

This feature is designed to provide daily encouragement, foster a positive mindset, and keep users engaged with fresh content on every visit. Whether users are starting their day or need a quick boost, the rotating quote functionality adds a thoughtful and uplifting touch to the overall app experience.

3. Role Selection -

After logging in, users are presented with a simple role selection screen. They can choose whether they are a teacher or a student, which tailors the app's flow and content according to their needs. there are three mode -
